

KSTP AM 1500 News & Talk Radio

January 18, 1988

Dear Mr. Burrows,

This will confirm your reception report dated 11/17/87/. KSTP operates on 1500KHz with a power of 50,000 watts. KSTP is non-directional during the day, operating on a 660' Franklin type antenna. KSTP is directional at night, operating on a three tower directional array. These towers are 330' high.. KSTP broadcasts 24 hrs. a day, seven days per week. Our general coverage area is the metropolitan twin city area and their subberbs. The transmitter and studios are located in Maplewood, which is a subberb of St. Paul, Mn. KSTP is a ABC network affiliate. KSTP has received listener reports as far away as Australia and New Zealand both day and night. KSTP is a news and Talk station. I answer many DX reports, most of them are received during the winter months. Thank you for your report, and good luck with your DXing in the future.

Yours truly,

Norm Paetznick
